

**START Your POOL with these EASY STEPS
& Maintain Your POOL
with 1 of our 3~STEP Programs to
ENJOY SPARKLING~BLUE WATER ALL SUMMER LONG!!**

#1 DRAIN WATER from the top of the cover.

- Use a siphon hose or a small cover pump.
- Be careful to not drain water from the pool through the cover.
- Once most of the water is removed, you can RAISE the WATER level in the pool and then remove the cover (or)
- You can clean the cover when it is still on the pool.
- A wet/dry vacuum works good for removing the last amounts of water from the cover.
- Use BioGuard STOW-AWAY to clean the cover & then store it in a large garbage container in a diluted solution of Stow-Away & water

#2 Insert all Baskets @ skimmer & pump, Insert All Plugs & Pressure gauge & gently tighten.

- Lubricate all o-rings & gaskets with a non-petroleum based lube.
- (See Heater info on the back of this sheet)

#3 Before Turning on the pump be sure that it is primed. Pour water into the pump basket until water enters the line to the pool, then secure the lid.

#4 Turn on pump with the Filter set on BACKWASH.

#5 Run until the backwash water clears. Turn the pump off & set to RINSE, run until water is clear. Now you are ready to FILTER.

- NEVER change the position on your filter with the pump running.
-

The 1st DAY of Opening ---

#6 VACUUM & BRUSH the pool to remove ALL Debris.

#7 If your pool has a heater or your make up water contains Iron you should add:

- Add _____ oz. **Pool Magnet** (or) _____ oz. **Staintrine**
 - (1 Qt/10,000 gallons) (1 Qt/ 20,000 gallons)
- If you use Mineral Springs System you MUST ADD:
 - _____Qt **Mineral Springs Stain & Scale** (1 Qt/ 5,000 gallons)

#8 Wait 1 hour then:

- Add _____ oz. **Natural Chemistry Pool Magic** (1 bottle/24,000 gallons)
 - Add _____ oz. **BACK UP** (or) **ALGAE ALL 60 Algicide** (1 Qt. /24,000 gallons)
-

The 2nd DAY of Opening ---

#9 Bring in a Water Sample for complete balancing after Vacuuming & Brushing.

#10 Add Balancing Chemicals per the Water Analysis Recommendation.

#11 Add at Night when the SUN is off the pool.

- _____bags **BURN OUT 3** (1-2 Bags/10,000 gallons) or **BURN OUT 73** (1 Bag/16,500 gallons)
- If the pool temp. is <75 degrees we recommend brushing after adding to avoid bleaching.
 - ~ (or) Add _____# **Super Soluble** (Mineral Springs Systems or pools needing to increase CYA) (2. Lb. per 10,000 gallons)
